

SERVICE IDEAS WORK TOGETHER 2008 CATALOG

EFFECTIVE JANUARY 15, 2008

WORK TOGETHER

For over 60 years, we've come to see that many of life's finest moments happen in much the same way: together. That's why we are passionate about bringing people to the table and have designed our products to do just that. Though all of the products in our catalog have a singular purpose, the best part is - like so many of us - our products work even smarter and accomplish even more when they are put together. If you'd like creative new ways to combine our products and wow your customers, give us a call - because it's not just our products that work together. It's us. We look forward to working with you this year, and are committed to helping you meet your goals, whatever they are. Together.

YOUR PARTNERS,
THE MURRAY FAMILY
& TEAM SERVICE IDEAS

ABOUT LUX

OFFERED BY SERVICE IDEAS, INC.

TUSCANY GLASS

Glossy transparencies, colored reflections, elegant manufacturing. Beauty in a dish to be used everyday.

Since 1967 Lux has produced handcraft glass, creating original pieces for table service. Following the most up-to-date market requests and offering a wide range of shapes, models and colors.

Since 2005, Lux offers even more. The new 31.000 sqm building can house up to 12.000 pallets for more efficient warehousing, giving us the possibility to raise our customer service.

Let the Tuscany glass collection set the mood with unique table presentations that can be enjoyed everyday. Lux sets the table with charger plates, drinking glasses, pizza plates and sushi plates. The beauty of the glass overlapping makes the table the star for any event.

Let Lux emphasize every moment with bright colors, chic nuances and charming design.

The Tuscany glass collection is from the Montelupo Fiorentino, Italy, one of the most productive areas for glass items since the early 1500's, and is 1/4" thick, the appropriate thickness for hotel and restaurant use. It features colors that are in the glass material and won't fade or wear off.

Service Ideas, Inc. offers a new selection in the rain pattern as well as the Eco-Line, satin, nuage and others. All items are in convenient case packs.

THERMO-PLATE™ PLATTERS

Service Ideas, Inc's original Thermo-Plate™ Platter technology keeps hot foods hot and cold foods cold. Platters are ideal for steaks, pasta, seafood, poultry, sandwiches, omelets and ethnic presentations. Use the divided half plates for combinations of hot and cold presentations, or choose a round plate for specialties like escargot, oysters and deviled eggs. Lightweight polyester holders provide strength and durability and can greatly reduce replacement costs of broken china. Diagram below describes how the Service Ideas, Inc. Thermo-Plate™ Platter works.

CARE/HANDLING

To prevent warping, stainless and aluminum plates should never be subjected to an open flame. Instead, they should be heated only in an oven or on a griddle up to 350° F. Wood products cannot be washed with water. Wipe wood with a wood-friendly cleaner or a barely damp cloth.

CRESTING

Custom Cresting available with camera ready art. Increase awareness and reinforce your brand with Service Ideas, Inc's Custom Cresting program. Lead time with camera ready artwork is four weeks. \$7.00 list per color, 36 minimum.

CUSTOM COLORS

Custom Colors are available. 300 minimum.

HOT SOLUTIONS™ PLATTER

Nothing takes a steaming skillet from stovetop to tabletop like the HOT SOLUTIONS platter. It tolerates temperatures up to 500° F, without transferring the heat—and frames your skillet in the color of your choice.

FEATURES:

- The lightweight insulation protects the table from heat transfer.
- Side rails protect hands from hot skillet.
- The edge is rolled for an upscale look and easy handling.
- The platter fits any standard fajita skillet and includes room for the skillet to expand when heated.
- A notched foot holds the skillet steady and allows for draining when washing.
- Platters are stackable.
- Custom colors, shapes, and molded logos are available.

SERVERS AN INTIMATE TABLE FOR TWO. A BOUNCING BISTRO OF TWO HUNDRED. A MOM-AND-POP COUNTER WITH TOO MANY SPECIALTIES TO COUNT. WHATEVER THE STAGE, WE'LL HELP YOU SET IT. OUR INSULATED SERVERS KEEP COFFEE HOT FOR HOURS. OUR ICE TUBE PITCHERS KEEP BEVERAGES COOLED AND UNDILUTED. FROM MORNING TO MIDNIGHT AND EVERY EVENT IN BETWEEN, WE'VE GOT THE SERVERS YOU NEED.

PLASTIC-LINED SERVERS

HANDLING

For optimal retention, remove or flip open lid and preheat server with warm water. Empty contents and refill with hot beverage. Secure lid closure. Server will maintain optimal retention no longer than 2-3 hours. Varying factors that effect temperature are content levels, topping off, open lids. Servers should not be heated in a microwave.

CLEANING

For optimal care, servers should be hand washed with mild detergents. Where noted, servers constructed with an ultrasonic weld are dishwasher safe in most commercial dishwashers where temperatures do not rise above 185 F. However, please check MSDS forms of detergents since some do interact unfavorably with plastics. To clean push-button lids, depress button and flush water through. Push button lids are not dishwasher safe. Never clean plastic servers with vinegar as it will be absorbed by the material and leave a vinegar taste.

STORAGE

Store in a cool, dry place away from any heat sources.

TROUBLE SHOOTING

Cracks in body are usually from a chemical reaction and extended use. Bulging to the inner liner or exterior body may be caused by extreme heat conditions. Welded lids may separate over time and are able to be purchased separately. Gapping may occur between joints of the product as a result of wear and tear over an extended time. Servers should never be heated in a microwave.

WARRANTY

Products noted with symbol are warranted against manufacturer defects for specified years. As a manufacturer of fine products, Service Ideas, Inc. is interested in knowing about any problems you may experience. We will work with you individually to determine if the problem is caused by a manufacturer's defect.

PLASTIC SERVERS

- Durable, impact-resistant ABS outer shell resists cracking, chipping and peeling
- Double wall body
- Environmentally safe polyurethane foam insulation
- Inner liner heat, impact and stain resistant
- Reinforced handle for added safety
- Completely sealed, all sonic welded body

PANTONE MATCHING SYSTEM

The Pantone Matching System (PMS) allows you to know the specific color of your servers so you can coordinate with color schemes of other pieces or decor. The following numbers represent the colors of the New Generation line:

SC1HA	HOT SHEET: HOT WATER, REGULAR, DECAF, HOUSE (5 EACH OF 4=20)

STAINLESS-LINED SERVERS

HANDLING

To obtain optimal retention, remove lid and preheat with warm water. Empty water, refill with hot beverage and replace lid.

HEAT RETENTION CHART

ALL TESTS ARE DONE AT FULL CAPACITY.

CLEANING

Exterior-wipe with a soft, damp cloth and follow with dry cloth. Interior-clean with warm water and mild detergent. Rinse with hot water. Never submerge server in water or place in a dishwasher. Lids may be rinsed with hot water.

STORAGE

Product is best stored in a cool, dry place away from all heat sources.

TROUBLE SHOOTING

If your server is not holding heat and the above procedures are followed, it may be a result of a broken vacuum. A strong impact and dishwashing may contribute to the vacuum being compromised.

WARRANTY

As a manufacturer of fine products, Service Ideas, Inc. is interested in knowing about any problems you may experience. We will work with you individually to determine if the problem is caused by a manufacturer's defect.

STAINLESS FACTS

Stainless steel is an alloy that starts with basic iron with up to 8 alloys added, depending on the quality. The major alloys in stainless steel are chromium and nickel. The chromium provides rust, corrosion resistance and durability. Nickel provides additional rust resistance, strength, and high polishing characteristics.

The numbers 18/0 indicates 18 percent chromium and 0 percent nickel. 18/8 indicates 18 percent chromium and 8 percent nickel. 18/10 indicates 18 percent chromium and 10 percent nickel. The more percent of nickel, the higher the grade and the higher the costs. While 18/0 is not necessarily unsatisfactory, it is not considered corrosion resistant.

PARTS BNPL BLACK LID (CASE PACK 6)
BNPLOR ORANGE LID (CASE PACK 6)

Unplug the heat plate of the coffee maker and use the following formula to figure out how much it will save you: 1) Check the wattage of the machine. Ex. 200. 2) Multiply wattage by the number of hours your appliance is in use. Ex. 200 x 16hrs/day = 3,200. 3) Divide by 1000 to get Kilowatt hours. Ex. 3,200 / 1,000 = 3.2 KWH. 4) Check your local Kilowatt hourly rate. Ex. Clark County (Las Vegas), is 5.73 cents per KWH. Multiply your KWH by the local rate. 3.2 KWH x .0573 = .18 cents/day. So you save \$65/year, per warmer, which pays for the server.

PAGE 49

GLASS-LINED SERVERS

HANDLING

For optimal retention, remove lid and preheat server with warm water. Empty water and refill with hot beverage. Server will retain optimal retention for 8+ hours.

HEAT RETENTION CHART

CLEANING

Service Ideas, Inc. recommends that all products with vacuum insulation be hand washed. Exterior: Wipe with a soft, damp cloth, follow with a dry cloth. Interior: Clean with luke warm water and mild detergent and rinse with hot water. Never submerge in water, place in a dishwasher, use a brush that may scratch glass liner or use harsh chemical detergents.

STORAGE

Best if stored in a cool, dry place away from any heat sources. Trouble shooting: Moisture between the outer shell and bottom plate or leaking, in most cases is a result of server being immersed in water or liner not secure within body. Liner may be adjusted by tightening bottom plug.

WARRANTY

As a manufacturer of fine products, Service Ideas, Inc. is interested in knowing about any problems you may experience. We will work with you individually to determine if the problem is caused by a manufacturer's defect.

WHY ALFI?

Alfi decanters bring taste to your table. In every possible way.

HOT LOOKS

Award-winning designers like Ole Palsby and Tassilo von Grolman partner with Alfi to create servers that make a statement. The Alfi brand is known worldwide as the ultimate in chic.

HOT DRINKS

Years of research on heat flow, heat conduction, and heat radiation give Alfi unmatched performance. Vacuum-insulated, double-walled Alfi Dur-Hard glass with silver lacquering ensures that virtually no heat can escape.

COOL OPTIONS

Alfi provides a range of servers to fit any budget and application, including those with double-walled, vacuum-pumped, stainless steel inserts, which perform nearly as well as glass—and won't break.

Choose Alfi—and choose the style that sets you apart.

CUSTOM ENGRAVING & REPAIR

Increase awareness and reinforce your brand with Custom Engraving. We engrave right on carafes, turning them into personalized statements. Lead time with camera ready artwork is four weeks.

\$2.00 LIST PER LETTER, LOGOS TO BE QUOTED; 12 EACH MINIMUM.

ALFI CARAFES WITH MINIMAL DAMAGE MAY BE REFURBISHED.

\$20.00 PER HOUR CHARGE PLUS PARTS AT STANDARD DISCOUNT. CALL FOR ESTIMATES.

SPECIALTY

SERVERS

If you're going to make an impression, make it incredible. And if you're going to make coffee, why not make it French press? We've got everything you need to leave a lasting impression on any guest—whether you want hand-pressed coffee, loose-leaf tea, or perfectly chilled iced drinks. Add an extra shot of sophistication and flavor to any affair with just the right server.

HOW TO USE A FRENCH PRESS

1. Warm glass bowl beforehand and fill with appropriate amount of medium ground coffee or tea. One heaped teaspoon (approximately 10g.) for one cup.
2. For best results pour water which has just come to a boil, place lid on and let steep.
3. After grounds or tea leaves settle towards bottom (approximately 3 minutes), push filter down and pour.

BREWING TEA

- Use Fresh or bottled water whenever possible. Water quality is important to the flavor of the tea.
- For black teas, bring the water to a full rolling boil, but do not over-boil the water. For green teas, bring the water just to the boiling point (steaming.)
- Fill your teapot with hot water to pre-warm before adding tea leaves and hot water to the pot.
- Add one level teaspoon of tea leaves for every cup of water. Tea strainers and infusing baskets may be used, or the leaves may be added directly to the pot.
- Pouring hot water over tea leaves starts the steeping process.
- Steep full black leaves four to five minutes. Steep delicate green teas and smaller leaf teas for three minutes.
- Experiment with brewing times and the amount of tea leaves used to adjust to your own taste.

FORM + FUNCTION

AIRPOTS

AIRPOTS IS IT POSSIBLE TO CREATE PERSONALLY SERVED AMBIANCE WITH A SELF-SERVE SET UP? ABSOLUTELY. OUR STAND-ALONE SERVERS COME IN THE SIZE AND STYLE YOU WANT, WITH THE FEATURES THAT MAKE ANY GUEST FEEL PAMPERED. AN ELEGANT FORM IS USELESS WITHOUT A MEANINGFUL FUNCTION. WE DELIVER BOTH. WHILE YOUR CUSTOMERS ARE NOTICING THE UNIQUE DESIGN OF YOUR AIRPOTS, YOU'LL BE SEEING THAT YOUR BEVERAGES ARE SERVED EXACTLY THE WAY YOU WANT.

SERVICE IDEAS' ECO-AIR® "BUILD YOUR OWN" AIRPOTS

Mix and match your choice of shell, liner and lid, to customize all of our Eco-Air® airpots to get exactly what you need. Not sure how to get the airpot you want? Our customer service representatives can help you with that.

AIRPOT PARTS DIAGRAM

- A Lid (includes: bellows, lid gasket)
- B Suction Pipe (includes: collar gasket, tip gasket, tube, spout)
- C Exterior Stainless Steel or Plastic Body
- D Screw (may need to unscrew to remove liner)
- E-G Glass Liner (includes: E-rubber gasket, F-liner, G-plastic protector on glass liner)
- H Black Base
- I Plug (center bottom)

3-STEP TROUBLESHOOTING

If liquid is not dispensing or liquid is not staying hot, the following are possible solutions.

1. Tighten the center plug, located in the center of the bottom base, to secure the liner and gasket against the collar of the airpot.
2. When airpot is empty, pump or push the lever of the lid and check for airflow against the palm of your hand.
3. Inspect suction pipe for cracks.

If your airpot does not work after checking for these problems, call Customer Service at 800-328-4493.

CARE/HANDLING

How to Use: For optimal retention, flip open lid and preheat airpot with warm water. Empty water and begin brewing directly into the airpot if your brewer allows you to do so, or refill with hot beverage. Close lid. Glass airpot will retain optimal retention for 8+ hours, Steel airpot will retain optimal retention for 4-6 hours. Avoid careless handling such as tilting, tipping, dropping or any strong impact which may result in damage to the liner and vacuum seal.

Liner replacement: Remove lid. Unscrew metal screw at base of airpot. While holding airpot over garbage loosen bottom plug enough to unscrew entire base. Remove base and carefully remove broken glass and liner gasket. Cautiously wipe out interior with damp cloth until all glass particles are disposed. Insert new liner with new gasket. Replace base and secure liner in place by re-tightening plug. Finally, replace screw and lid.

How to clean exterior: Wipe with a soft damp cloth, follow with a dry cloth. **How to clean interior:** Clean with luke warm water and mild detergent and rinse with hot water. Never submerge in water, place in dishwasher, use brush that may scratch glass liner or use harsh cleaners.

STORAGE

Best if stored in a cool, dry place with lid off.

APPLICATION SUGGESTIONS

Vacuum Glass Airpots: 8+ hour retention required

Stainless Steel Airpots: 4 hour retention required, unbreakable stainless liner ideal for heavy duty applications, transporting

Plastic Outershell Airpots: Available in five colors, these economy airpots offer a durable plastic exterior that eliminates denting and adds color

ACCESSORIES

Static labels, Airpot racks, Airpot Cover-Ups and ID Chains.

WARRANTY

As a distributor of fine products, Service Ideas, Inc. is interested in knowing about any problems you may experience. We will work with you individually to determine if the problem is caused by a manufacturer's defect.

TERMS AND CONDITIONS

TERMS

1% 10 days from date on invoice, net 30 days. Accounts showing balances owing past 60 days will be placed on credit hold and charged 1% interest per month. Orders may be paid by MasterCard or Visa at receipt of invoice. Any orders paid by credit card later than 10 days from invoice date may be subject to 3% handling fee.

FREIGHT

Orders totaling 0 - \$149 net will be charged \$10.00 for shipping and handling. Orders totaling \$150 - \$1,200 net will be charged 8% of invoice total for shipping and handling. Single orders that exceed \$1,200 net will be shipped freight prepaid within the United States. Any prepaid or 3rd party shipping is subject to a \$8.00 net handling charge.

BROKEN CASES

All products are sold in standard packing cartons only as listed in the price list. Any order calling for less than standard pack will be charged \$5.00 NET PER CASE.

CREDIT

Orders placed by buyers without established credit with Service Ideas, Inc. must be accompanied by check, credit card or credit application. Initial orders for open credit status must meet a minimum net total of \$500. Orders will ship as soon as possible after credit has been approved or regular check has cleared. Orders paid by cashier's check, MasterCard, Visa, certified check or money order will ship as soon as possible. Call 1-800-328-4493 for exact cash amounts or to request a credit application. We reserve the right to establish or refuse any business entity or individual as a customer.

PRICES

All prices in US dollars (\$) and subject to change without notice.

LOST AND DAMAGED SHIPMENTS

Risk of loss is buyer's upon delivery to carrier; therefore, whenever the seller shall deliver or cause to be delivered to a common carrier any goods ordered by buyer, whether the particular common carrier shall have been designated in the shipping or routing instruction of buyer or not, seller shall not be responsible for any delays or damages in shipment and the common carrier to which the seller shall deliver goods shipped to buyer is hereby declared to be the agent of the buyer. All shortages or damages must be reported within 48 hours to the carrier and Service Ideas. Secure an inspection report from the carrier. Concealed damage not reported to Service Ideas within 30 days of delivery will not be eligible for credit.

RETURNS

By definition, returns are any merchandise sold by Service Ideas, Inc. that is to be returned to the factory. Returns within 6 months of invoice date are NOT SUBJECT TO A RESTOCKING CHARGE. Returns received 6-12 months of invoice date or related to overstock are subject to restocking charges, not to exceed 20%. No returns will be accepted after 12 months. All returns to be restocked must be complete case packs, received in the unopened original cartons and merchandise must be current, standard catalog items. We are unable to accept returns of obsolete, special order, custom or crested products.

No merchandise will be accepted for return without prior authorization. To receive authorizations please call 1-800-328-4493 and provide the following information. All returns must be freight prepaid.

- Company name, address, phone number
- Exact carton count
- Original invoice number and purchase order number
- Reasons for return
- Exact quantity and model numbers
